How to Link to or Embed a Video from *Films on Demand* and *Alexander Street Press* (*VAST, Filmmakers Library Online*, and *Sports Medicine and Exercise Science in Video*)

Kimbel Library provides access to streaming videos that can be linked in your course for students to view. You can choose to link to a short segment or the entire film.

**To link to a video in your Moodle course:**

1. Find the video you’d like to link to. Visit the following websites to view our collections:
   - *Films on Demand*
   - *VAST*
   - *Filmmakers Library Online*
   - *Sports Medicine and Exercise Science in Video*
2. Select a video by clicking on the video title.
3. Select either the entire film or the desired segment.
4. For *Films on Demand*, scroll to the bottom of the page beneath the video description, and copy the “Title URL” or “Segment URL.” For *Alexander Street Press*, click the “Embed/Link” option at the top of the page (for full videos) or beside the clip (for segments).
5. Open your Moodle course and choose a location for the link.
6. To add the link:
   a. Click on “Add a resource.”
   b. Select “URL” and press “Add.”
   c. Type the name.
   d. Paste the URL into the “External URL” box.
   e. Add the CCU proxy prefix to the front of the item, if required: [http://login.library.coastal.edu:2048/login?url=](http://login.library.coastal.edu:2048/login?url=) (Note: If you copied the persistent link from *Films on Demand*, the proxy URL will already be included so you will not need to add it manually.) This proxy prefix ensures the article will be accessible from off-site. Paste the persistent URL directly after the “url=” of the CCU proxy URL. Do not leave any spaces between the = sign and the persistent URL.
   f. Click “Save” to view the link in your Moodle course.

Be advised that students accessing these articles from off campus will be prompted to login with their CCU user name and password.
To embed a video in your Moodle course:

Note: You can only embed films from Films on Demand, not from Alexander Street Press (VAST, Filmakers Library Online, and Sports Medicine and Exercise Science in Video)

2. Select a video by clicking on the title.
3. Select either the entire film or the desired segment.
4. Click on the “Embed this Video” link directly beneath the video player.
5. Copy either the “Embed Code” or the “Alternate Embed Code.” They work equally well.
6. Open your Moodle course.
7. To add the link:
   a. Click on “Add an activity or resource.”
   b. Select “Label” and press “Add.”
   c. Select “Show editing tools,” if necessary.
   d. Click the “Edit HTML Source” link above the Text box.
   e. Paste the Embed Code and then click “Update.”
   f. Click “Save.”

You may need to refresh the page before you can view the video.
